

MigmaMidblock™ for Pedestrian Detection

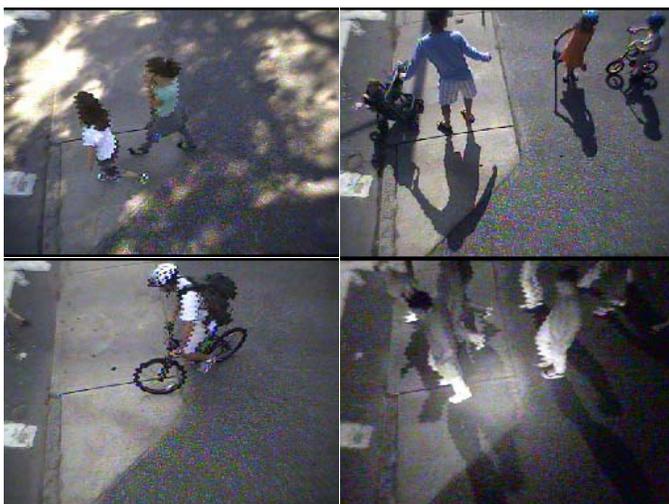

MigmaMidblock™ is a sophisticated pedestrian detector bundled with

- △ High resolution IR LED stereo camera for day and night
- △ High performance single board computer (SBC)
- △ Relay with output voltage from 12 - 24 VDC
- △ Pedestrian detection algorithms using stereo vision analysis
- △ Java-based engineering configurator through remote access

MigmaMidblock™ offers advanced features for pedestrian detection at midblocks and street intersections.

- △ Analytical video cueing and 3D pattern recognition
- △ Pedestrian detection at both day and night (total darkness)
- △ Work under any weather conditions
- △ Remotely configurable pedestrian detection zone
- △ Interface with flasher and traffic controller
- △ Small size suitable for pole mount cabinet
- △ Easy to install and maintain
- △ Superior detection performance with very low false calls

MigmaMidblock™ is designed to meet the traffic engineering requirements for pedestrian detections in outdoor environment. Built-in IR LEDs are turned on under low illumination for night time pedestrian detection.

- △ Image Sensor - 1/3" Sony CCD Chip
- △ Camera Mounting Height - 10 ~ 15 ft
- △ Camera Horizontal Resolution - 540 TV lines
- △ Detection Zone Size - 8 x 5 ~ 12 x 8 (ft)
- △ Activation Time - 1 ~ 5 s
- △ IR Range - 100 ft (~30m) in total darkness
- △ S/N Ratio - ≥ 48 dB
- △ Cable - RG59 coax video and power
- △ Operating Temperature - -4 °F ~ 140 °F (-20 °C ~ 60 °C)
- △ Operating Humidity - 0% ~ 96%
- △ Power Requirement - 110 VAC and 12 VDC
- △ Operating Environment - All weather, day and night
